

How Resolve helped rejuvenate a retired racehorse

BEFORE

AFTER

"Her overall appearance and attitude have bloomed and now shine beautifully..."

- LEANDRA COOPER

Leandra Cooper, a New Vocations facility manager, was experiencing issues with their retired Thoroughbred, Netti. Netti struggled with rain rot and all over poor hair and skin condition. Leandra says the Thoroughbred seemed uncomfortable in her own skin, ultimately affecting her attitude.

Leandra began using Resolve and described it as a "one-step fix."

"We applied Resolve directly to Netti's skin hot spots," said Leandra. "The product was easy to use, and the application was clean and simple."

Leandra and Netti's story is just one of a number of successful stories associated with Resolve, the antimicrobial spray that works on bacterial and fungal skin infections such as scratches, mud rash, rain rot, ringworm and thrush.

How Resolve healed a hunter-jumper horse

BEFORE

AFTER
(results after 1 week)

“Resolve is the best solution we have found that works to cure summer sores...”

- DR. LYNSEY WHITACRE

Dr. Lynsey Whitacre's hunter-jumper horse, Ursianna, was experiencing summer sores. Ursianna's summer sores would sometimes last months, and other products were not helping the irritations on her sensitive skin.

Lynsey began using Resolve and described it as the “best solution” for treating summer sores.

“So thankful for Hagyard Pharmacy's Resolve skin spray. It's a lifesaver!” said Lynsey. “It also works great on other cuts and thrush!”

Lynsey and Ursianna's story is just one of a number of successful stories associated with Resolve, the antimicrobial spray that works on bacterial and fungal skin infections such as scratches, mud rash, rain rot, ringworm and thrush.
